TITLE : SMART FILM FINDER WITH POPULARITY INSIGHTS

STUDENT NAME: CH. VIVEK

CLUSTER:04

SECTION:13

STUDENT ID: 2520030532

DEPARTMENT: CSE

PROJECT : PBL – FRONTEND WEB DEVELOPMENT & DSA

UNDER THE GUIDANCE OF: B.SRINIVAS
ASSISTANT PROFESSOR
DEPARTMENT OF CSE

ABSTRACT :

•SMART FILM FINDER IS A MOVIE SEARCH APPLICATION.
•HELPS USERS FIND MOVIE INFORMATION QUICKLY.
•USES **OMDB API** TO FETCH REAL-TIME MOVIE DATA.
•DISPLAYS MOVIE RATING, VOTES, POPULARITY, AND PLOT.
•INCLUDES **SMART POPULARITY INSIGHTS AND RECOMMENDATIONS**.
•IMPLEMENTED USING **HTML, CSS, JAVASCRIPT AND JAVA (DSA)**.

•The application goes beyond simple data retrieval by implementing a **"Smart Logic" layer** that automatically categorizes films into qualitative tiers (e.g., "IMDb Hit") and popularity ranks based on vote volume. Key technical features include a **persistent favorites system** powered by localStorage, a responsive **dual-theme interface**, and fluid **CSS-animated transitions**. CineFinder provides a streamlined, professional-grade discovery tool that bridges the gap between complex database queries and a user-friendly browsing experience.

EXISTING SYSTEM :

- USERS MANUALLY SEARCH MOVIE INFORMATION ON DIFFERENT WEBSITES.
- NO CENTRALIZED MOVIE SEARCH SYSTEM.
- LIMITED INSIGHT ABOUT POPULARITY OR RECOMMENDATIONS.
- LACK OF SMART FILTERING OR ANALYSIS.
- TIME CONSUMING TO COMPARE MOVIES.

PROPOSED SYSTEM

- SMART MOVIE SEARCH PLATFORM.
- PROVIDES DETAILED MOVIE INFORMATION INSTANTLY.
- CALCULATES POPULARITY USING IMDB VOTES AND RATINGS.
- DISPLAYS MOVIE RECOMMENDATIONS AND VERDICT.
- INCLUDES FAVORITES SYSTEM AND RANDOM MOVIE SUGGESTIONS.
- IMPLEMENTS DSA ALGORITHMS FOR EFFICIENT SEARCHING AND SORTING.

SYSTEM ARCHITECTURE :

USER → WEB INTERFACE → API REQUEST → MOVIE DATABASE → RESULTS DISPLAY

COMPONENTS:

- USER INTERFACE (HTML + CSS)
- APPLICATION LOGIC (JAVASCRIPT)
- OMDB (OPEN MOVIE DATABASE) API FOR MOVIE DATA
- JAVA DSA MODULE FOR ALGORITHMS
- TERMINAL-BASED MOVIE MANAGEMENT SYSTEM

PROJECT MODULES

1.MOVIE SEARCH MODULE

1. SEARCH MOVIES USING TITLE.

2.POPULARITY ANALYSIS MODULE

ANALYZE RATING AND VOTE COUNT.

3.FAVORITES MODULE

SAVE FAVORITE MOVIES.

4.RECOMMENDATION MODULE

PROVIDE MOVIE VERDICT AND SUGGESTION.

OBJECTIVES

- BUILD A SMART MOVIE SEARCH SYSTEM.
- IMPLEMENT FRONTEND WEB TECHNOLOGIES.
- INTEGRATE REAL-TIME MOVIE APIS.
- APPLY DATA STRUCTURES AND ALGORITHMS CONCEPTS.
- PROVIDE POPULARITY INSIGHTS AND RECOMMENDATIONS.

CO'S ATTAINMENTS (FWD)

CO1

- UNDERSTAND HTML STRUCTURE AND CSS STYLING.

CO2

- CREATE RESPONSIVE UI COMPONENTS.

CO3

- IMPLEMENT JAVASCRIPT FUNCTIONS AND DOM MANIPULATION.

CO4

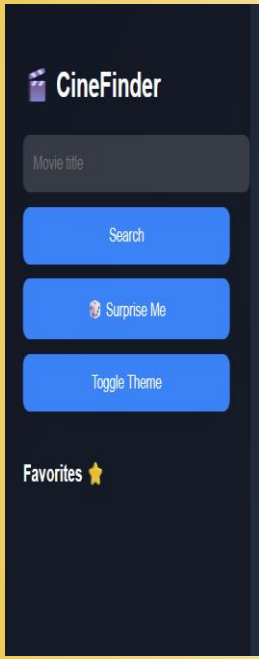
- INTEGRATE EXTERNAL APIS.

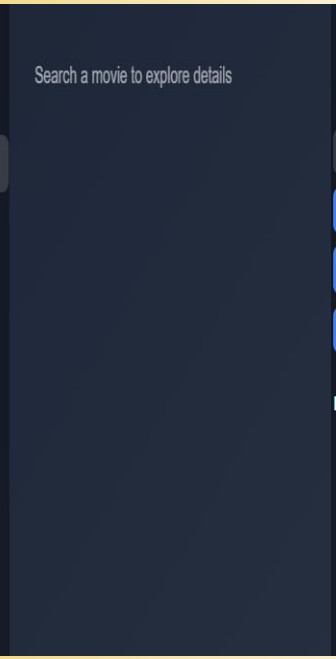
CO5

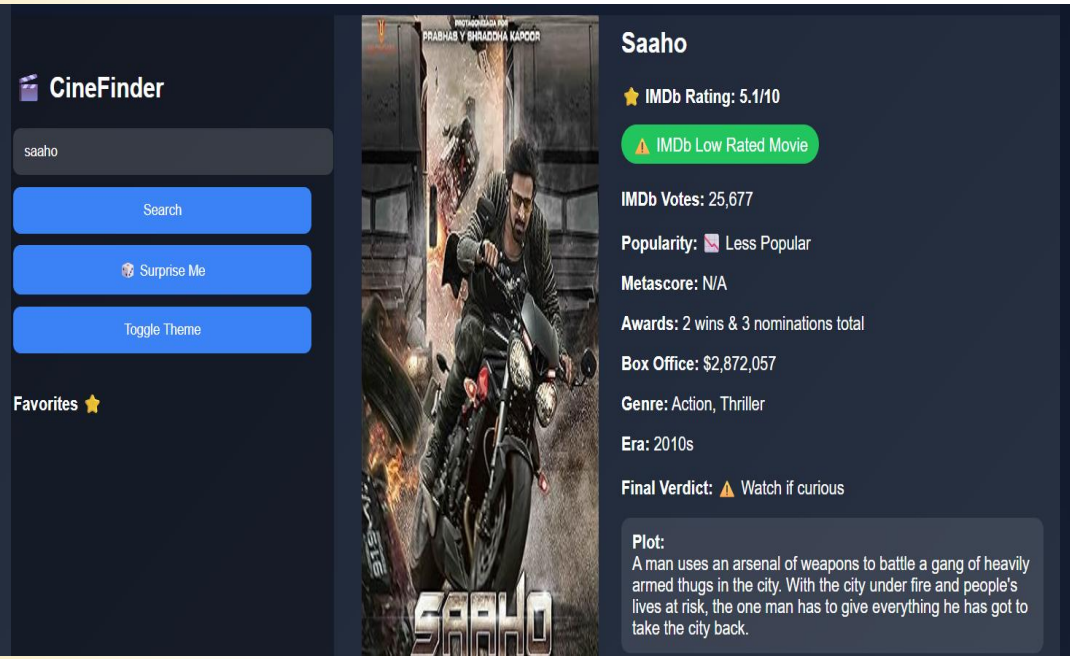
- DEVELOP COMPLETE WEB APPLICATIONS.

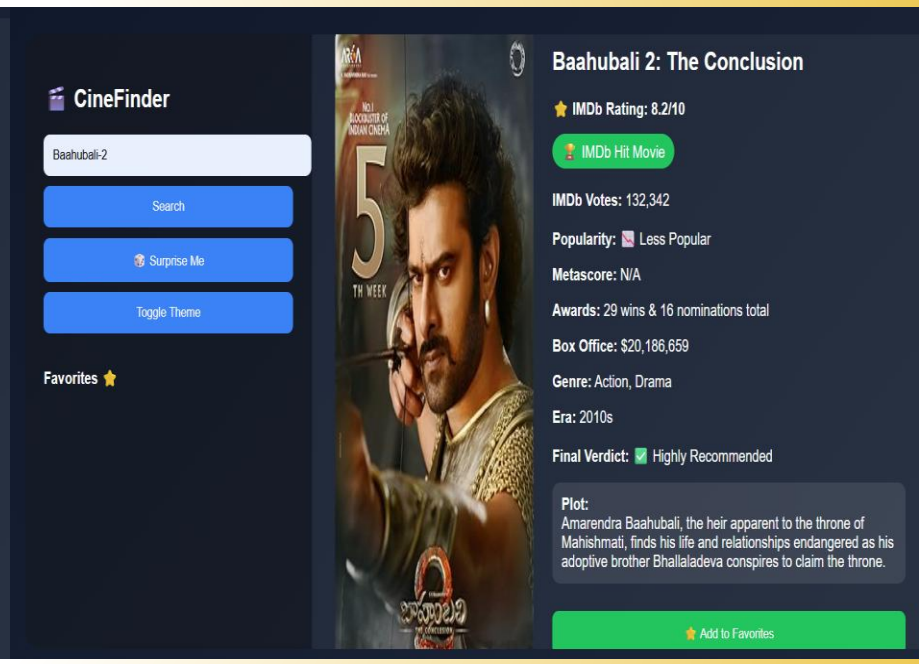
SCREENSHOTS :

- Movie search interface
- Movie result display
- Popularity insights
- Favorites section
- Random movie feature









CONCLUSION :

- DEVELOPED A SMART MOVIE SEARCH SYSTEM.
- INTEGRATED **WEB TECHNOLOGIES AND DSA CONCEPTS**.
- IMPLEMENTED MOVIE POPULARITY ANALYSIS.
- PROVIDED USER-FRIENDLY INTERFACE.
- DEMONSTRATED EFFICIENT SEARCHING AND SORTING ALGORITHMS.
